**2015-2016**

**KYB AUTO PARTS CATALOG SPORTS OF STREET**

**[www.kybclub.com](http://www.kybclub.com)**

## How to Read the Catalog

### ■ Searching for New SR Special for Toyota Vitz

- 1) Check the model and year of the car for which you want to search.
- 2) Check the grade (grade, engine type, body style (sedan, wagon, etc.) and number of doors, etc.) and number of doors, etc. See below for the meanings of the numbers that are followed by parentheses ( ) in regard to the grade.
- 3) Check the column of the desired shock absorber, and search for the part number.

### Model Number Chart by Car Type

⚠ As for special features (i.e. lower ride height), if no relevant comment is provided, no such feature is provided.

MODEL/YEAR	Grade	Front Rear	NEW SR Special	
<b>■ VITZ</b>

NCP10	2(RS), 4(2NZFE(1.3L)), 7(3Door, 5Door), 11(FF), 12(The MR-NCP13 Real Sports Damper Kit is a shock absorber set for one vehicle (height adjustment through the adjustment of the shock absorber length). For details, see the applicable page(s) in the MS catalog.)	F	NST5206R.L	WST5206R.L
00/6 ~		R	NSF2051	WSF2051 MR-NCP13

#### ● Mention of Electronically Controlled Shock Absorber

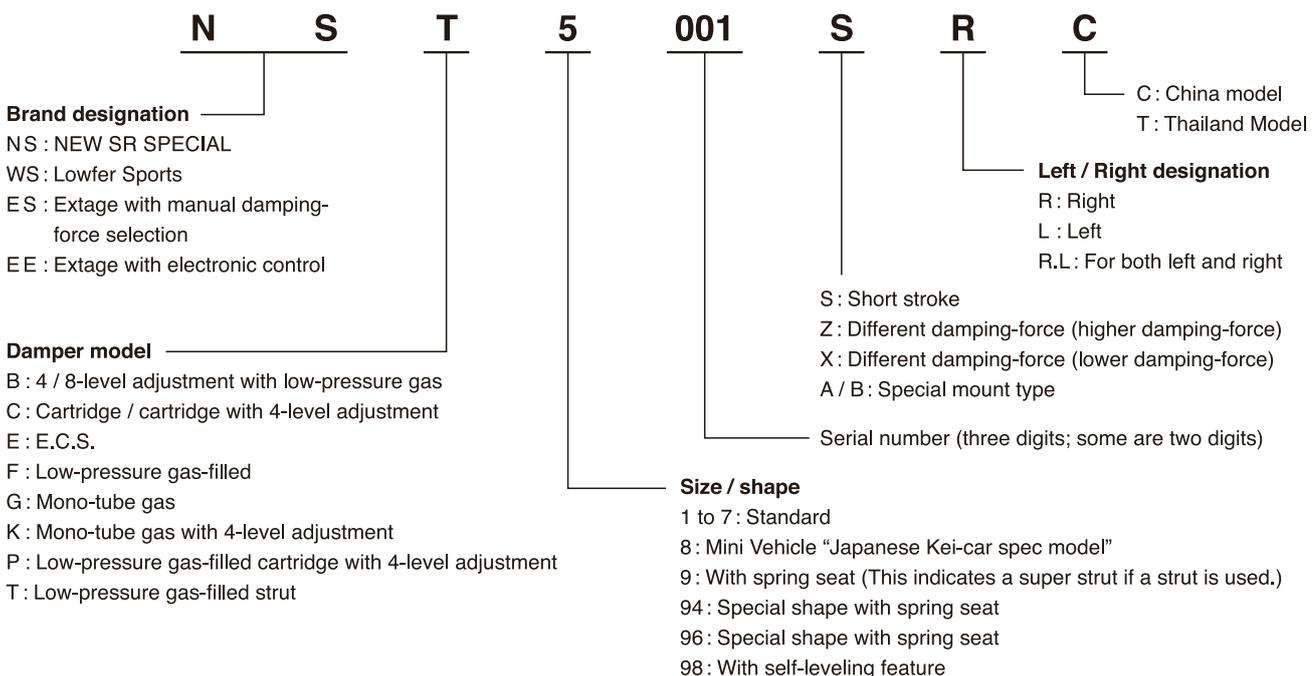

If the shock absorber has a special electronic control feature, it will be mentioned in the "Model" column. Please note that, if there is no mention of it in the column, the electronically controlled shock absorber is not used in the car.

- 1 (name), 2 (grade), 3 (engine type), 4 (engine model),
- 5 (exterior design), 6 (body style), 7 (door),
- 8 (passenger capacity), 9 (cargo capacity), 10 (tire),
- 11 (drive), 12 (note)

\* For Vitz, it will be as follows: Grade (Classic), engine model (2NZFE), number of doors (3-door/5-door).

**\* Before replacing a cartridge, confirm whether the strut can be disassembled from the car in which it is installed. Please note that the cartridge cannot be installed in a car containing a strut that cannot be disassembled.**

### Outline of Model Number System

# KYB responds to all car suspension needs with the advanced technologies of a specialist manufacturer of shock absorbers.

The concept that is common to all of the shock absorber products of KYB is "Achieve both a comfortable ride and high driving stability". Our goal is to create products that can be used comfortably and with confidence when driving with family and friends.

Development

Safety

**Sports**

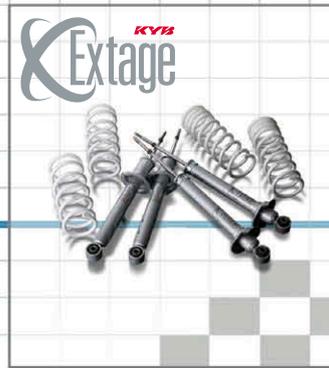

**Standard**

**Comfort**

**Lower Sports**  
Suspension Kit system.

**Premium**

STREET & PREMIUM

**NEW SR SPECIAL**

Our basic high-performance shock absorber model. We pursue a balance between a secure feeling for daily transportation and a comfortable ride.

**Lower Sports**  
Suspension Kit system.

Genuine shape short-stroke shock absorbers for lowrider style suspensions. They can also be installed as a suspension kit with the L·H·S (L-KIT).

**Lower Sports**  
**L·H·S**  
Low rider suspension.

A high quality coil spring that works best with the Lower Sports shock absorber. The ratio is set for a balance between an appropriate lowrider style, drivability and comfortable ride.

**Extage**

Extage is our premium shock absorber that provides a high quality comfortable ride and good handling. Damping force adjustment makes it possible to choose an optimal setting.

**SUPER SPECIAL**  
FOR STREET

Front and rear damping force adjustment in 4 levels that stresses controllability in diverse driving conditions.

SPORTS & COMPETITION

**REAL SPORTS DAMPER**

Real Sports Damper Series

**Spec TR**

The coil over kit series developed to shave 1/100 of a second of your time on the course. We reconfigured full-length type height adjustment for the Mitsubishi LANCER, Subaru IMPREZA and the Toyota 86 (Scion FR-S) and screw collar type height adjustment for compact cars.

**KCS**

The KCS series has 2 types of springs; the Straight Formed Coil that is necessary to set up the RSD SpecTR (Real Sports Damper Series) and Genuine Formed Coil.

**GRAVEL**

Basic suspensions designed for gravel motorsports.

**Spec GR**

Ajust for gravel, international rally standards suspension kit with a large reservoir tank and 3 way damping force adjustment.

# NEW SR SPECIAL

**Are you tired of ordinary driving performance but don't want a harsh ride?  
KYB New SR SPECIAL is the perfect choice!**

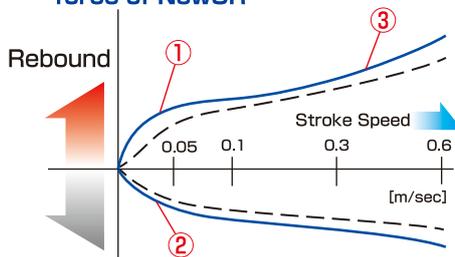

Dependably enhancing the basic performance of running, turning and stopping in any car.

KYB suspension tuning experts perform full vehicle testing for the installation of New SR shock absorbers and determine the optimal suspension characteristics for particular car model.

**Characteristic of the damping force of NewSR**

- ① Strengthening the rebound damping force at slower speeds makes the handling better by improving response.
- ② A smooth ride was assured by increasing the bound damping force by 5~10%.
- ③ Absorb the impact of bumps and seams by adjusting the entire volume of damping force above medium speeds.

**3**      **New SR** ———      **Genuine shock absorbers** - - - -

The New SR shocks are designed for improved damping force as compared to your car's original suspension, through the reduction of unwanted phenomena such as roll, pitch and nose dive. As a result, your car will demonstrate better handling response, greater stability while driving, and a shorter braking distance. (This is because the tires can function effectively.)

Better handling

Good Cornering

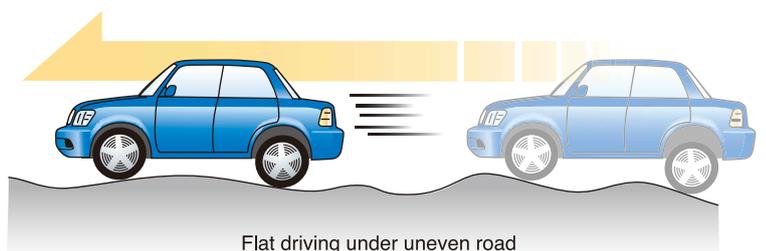

Reduce brake distance

Additionally, because the New SR shocks keep damping force from becoming excessive, you can enjoy long-distance driving without fatigue.

The New SR has the same shape as your car's original shock absorbers, but it offers greater durability than any other type of suspension (such as those that offer height adjustment).

Moreover, the New SR provides the same stroke as your car's original suspension, so you can drive on irregular terrain to a certain degree. (When driving on irregular terrain, the bump and rebound strokes are important.)

Flat driving under uneven road

**For cars with lowering springs,  
use shock absorbers that are specifically  
designed for them!**

## **Make your car the smoothest car on the road**

Advances in the overall performance of luxury cars, with improved power and increased rigidity, are a combination of high performance tires and tuning the suspension. Extage was developed as the premier brand to be used exclusively with the next generation of luxury cars. Every car has its own personality, just as their owners do. With them in mind, we poured all the latest advances in technology and craftsmanship into this product.

### **Treat your car to the best**

Extage does more than improve handling and offer a smoother ride. Extage provides a balance and a feeling of luxury, with tuning based on texture, giving you the sense that you're driving a better car.

### **Refusal to compromise is our default setting**

Circuit driving is all about handling and the balance between the front and the back. At the KYB testing track final decisions are made only after a good smooth ride has met expectations on both the ordinary track and the high speed track.

### **Lowering Coil Spring for Optimal Combination**

Extage does more than improve handling and offer a smoother ride. Extage provides a balance and a feeling of luxury, with tuning based on texture, giving you the sense that you're driving a better car.

### **Multi-Level(32-Level)Adjustment for Damping-Force to Meet a Wide Range of Driver Needs**

KYB has introduced a feature that makes the damping-force adjustable over 32 levels (for some models, eight levels of adjustment with the rear shock absorber). This new feature makes it possible to choose an optimal setting for the damping-force, which varies according to the tires used and the kind of ride desired.

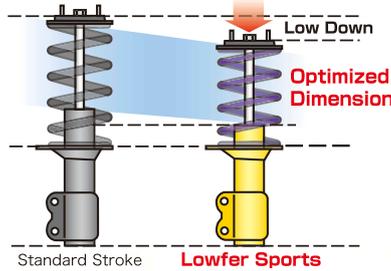

# Lower Sports

## Suspension Kit system.

For Vehicles with Lowered Suspensions

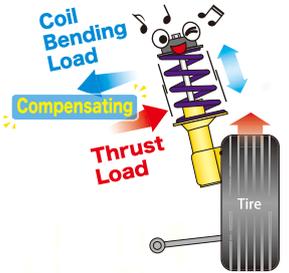

### Comfortable Ride with Lower Suspension.

When a lowering spring is installed, the ride height is lower than the height when a standard spring is installed. However, when a short-stroke shock absorber is used, its stroke will be nearly the same as that of the original shock absorber.

### Using genuine form

Shock absorbers dissipate the lateral stress of driving by using springs to move the suspension, which results in a smooth ride and responsiveness and reliable durability.

### Lowering Coil Spring for Optimal Combination

KYB also offers lowering springs we have designed specifically, and confidently, for Lower Sports in order to meet the needs of drivers who want to install the kind of lowering coil spring that will work best with the shock absorbers they have installed, thus ensuring optimal suspension performance.

## SUBARU

**PLEO** \* [Note] In the grade RS (both 2WD and 4WD), the rear disc brake gets engaged when the vehicle height is lowered. This is because, due to how the wire is routed, the brake wire gets pulled as the vehicle is lowered.

It is recommended that full stroke of the parking brake be 'adjusted from the normal fifth notch to 10th or more notch'.

**MIRA**

[Note] Because front shock absorbers are offered in two different part numbers for L510S, check for compliance (shown below) from the genuine part number on the right front side (driver's side) before installation.

48510-87L07/87L08→Compatible with NST8015RL 48510-87292/87L13/87L15→Not compatible because the length is different.

(To find a genuine part number, check the number stamped on the shock absorber or check the motor vehicle inspection certificate at the car dealer.)

## MAZDA

### ■ ATENZA

[Note] This KYB shock absorber package is also compatible with vehicle models that are not listed in the catalog if genuine part numbers of such vehicles are GJ6E-34-700F (front) and GJ6J-28-700B / GJ5A-28-700B / 700C / 700D (rear).

[Vehicles manufactured in October, '13] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front side 《Genuine part number》GHK5 28 700B / GHP9 28 700C ⇒ Install #SF2156.

《Genuine part number》GH5K 28 700C / GHP9 28 700D ⇒ Install #SF2157.

[Vehicles manufactured in October, '13] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front side 《Genuine part number》KD 45 28 910C (COINED KD 45 28 700A) ⇒ Install #SF2158.

《Genuine part number》KD 45 28 700C (COINED KD 45 28 700C) ⇒ Install #SF2159.

## MITSUBISHI

### ■ AIRTREK

That makes the turbo model an original setup that balances the following at a high level: the reduced impact from the road surface, improved steering response and corner damping.

**■ MOCO**

[Note 1]  Due to the delayed first year registration or other reasons, some vehicles may have a rear shock absorber with a different bottom shape even if the vehicles meet the compatibility requirements. Before placing an order, check the vehicle for the following:

The length of eye bush at the bottom mount of the rear shock absorber 32mm → #SF1042

The length of eye bush at the bottom mount of the rear shock absorber 60mm → NSF/WSF1042A

[Note 2] Spring seats of different heights are used in MG21S 04/2~04/12.

Use NST/WST5243R/L for vehicles with genuine part No. 54302-4A0A0.

## ■ SUNNY AD VAN

[Note 1] Because front shock absorbers of different shapes are used, check the following and choose the compatible part number before installation.

Front right side 《Genuine part number》54302-WD326/328 《Stamped part number》54302-WD301/303⇒ Install NST5340ZR/NST5340ZL.

《Genuine part number》54302-WD100/125/325/327 《Stamped part number》54302-WD100/300/302⇒ Install NST5340ZR/NST5340ZL.

[Note 2] Because rear shock absorbers of different shapes are used, check the following and choose the compatible part number before installation.

Both the rear left and right 《Genuine part number》56210-WA925 《Stamped part number》56210-WA900⇒ Install NSF9151.

《Genuine part number》56210-WD325/326 《Stamped part number》56210-WD300/301⇒ Install NSF9114Z.

## ■TIIDA

[Note] The above KYB shock absorbers may be installed in Autech's Axis if the part numbers of the genuine shock absorbers are as follows:

Front: NST5289RL can be installed for 54302-ED001/025. Rear: NSF1061 can be installed for 56210-ED001/025/301/325.

(To find a genuine part number, check the number stamped on the shock absorber or check the motor vehicle inspection certificate at the car dealer.)

**PLEO**

[Note] In the grade RS (both 2WD and 4WD), the rear disc brake gets engaged when the vehicle height is lowered. This is because, due to how the wire is routed, the brake wire gets pulled as the vehicle is lowered.  
 It is recommended that full stroke of the parking brake be 'adjusted from the normal fifth notch to 10th or more notch'.

# REAL SPORTS DAMPER

Whether you want to push the limits when driving a circuit or the street, or if you're looking for a level of performance that lives up to your expectations on gravel, the KYB Real Sports Damper provides authentic sports suspension.

For **Tarmac**

REAL SPORTS DAMPER

## Spec TR

Authentic sports suspension or street driving or circuit driving

MS-1

Performance

Tarmac

REAL SPORTS DAMPER

## GRAVEL

Basic suspension designed for gravel means you can enjoy off-roading whether you're a beginner or a licence-holder.

MS-3

REAL SPORTS DAMPER

## Spec GR

Gravel suspension has all the specs you need to win dirt trials or other off-road races.

MS-2

Gravel

For **Gravel**

## Real Sports Mind from KYB

RealSportsDamper TR was developed for you to shave your time and dominate the course. The high performance 32-level adjustable mono-tube damper will be valuable and indispensable items for you.

### Full-length Height adjust Type

The 32-level adjustable damping-force mechanism can be set with precision to shave your time. We can proudly say with confidence that because of the mono-tube structure is incredibly durable in every condition. This is the ultimate sports suspension designed for the people seek for the time.

### DLC film treatment piston rod

Rods and ram cylinders adopted to the Spec TR series have drastically lowered friction, increased hardness, wear resistance and seizure resistance by using the ultra-thin carbon coating treatment Diamond-Like Carbon (DLC) film treatment. Its flexibility and compliance give you the smoothest ride you'll ever know.

### Height adjustable shockabsorber with reliable structure

We adopted Full-length structure and Strengthening brackets. You can get the springs exactly how you want them so you can drive your car at the height you want. Built with an aluminum outer shell and high quality, incredibly durable parts proudly stamped with the KYB seal of approval, giving you peace of mind as you push the envelope.

### Application

#### MITSUBISHI

- LANCER Evo.5,6 / CP9A
- LANCER Evo.7,8,9 / CT9A
- LANCER Evo.10 / CZ4A

#### SUBARU

- IMPREZA / GDB (A~D, E~G)
- IMPREZA / GRB

#### HONDA

- S2000 / AP1
- CIVIC TypeR / EK9
- INTEGRA TypeR / DC2

### Pre-load Height adjust Type

Multi-Level(4-32Level) adjustment of damping-force  
 DLC(Diamond-Like Carbon)film treatment piston rod  
 Rear genuine form Coil Spring  
 Short stroke Spec to fit on Asphalt Road  
 (Rally tarmac & circuit)

### Application

#### TOYOTA

## Graavel Racing Spirit from KYB

This genuine form coil-over kit is born from the DNA of ZRseries. Offering a wide range of possible settings, so you can leave your rivals in the dirt trials or gravel rallies.

### Genuine form Height adjust Type

Genuine form coil-over kit for dirt-racing and rally use

### Height adjustable shock absorber (Genuine form coil-over)

Twin-tube with reservoir tank

### 3Way adjustment of damping force

(rebound-32 Level compression-16Level(Lowspeed), Stepless(Highspeed))

### Application

#### MITSUBISHI

- LANCER Evo.7,8,9/CT9A
- LANCER Evo.10/CZ4A

#### SUBARU

- IMPREZA/GDB(E,F,G)
- IMPREZA/GRB

### Staright form coil Height adjust type

#### Real Sports Damper Gravel for Compact Cars

Straight form coil Height adjust  
Multi-Level(32 Level) adjustment of damping force  
Rear Genuine form Coil Spring  
Optimized stroke to correspond to  
Gravel rally and Dirt trial

SWIFT SPORTS/for ZC31S

### Application

#### TOYOTA

- Vitz RS/NCP91, NCP131

#### SUZUKI

- SWIFT SPORTS/ZC31S, ZC32S

Real Sports Damper Gravel is a basic shock absorber that makes it easy to enjoy participating in gravel motorsports like rallies and dirt trials. The optimal structure and damping force characteristics designed for each vehicle type realize stable running even on rough road surfaces. You can get even more optimal settings by combining it with the KYB Competition Spring sold separately.

### Reservoir Tank Equipment

RSD gravel (for Lancer, Impreza) equipped with a reservoir tank, so damping force is exerted from start to finish. This gives them exceptional durability on rough roads and long distance competitions.

### 4 level adjustment dial

Some models of RSD gravel –twintube, equipped with 4 level adjustment dial that enables to change settings easily.

**KCS**

### KYB Competition Spring KCS

*Straight Form and Genuine Form*  
The tensile strength(2000N/mm) of this material which realizes a spring that's both lighter in weight and has improved permanent set resistance. This spring is processed to prevent buckling and has a spring rate set in 1kgf/mm increments.

### Pillow Upper Mount

*(Fixed type for compact cars)*  
Using the pillow ball on the mount that connects the shock absorber to the car body lets you feel road information directly and enables high-level sports driving.

### Helper Spring Seat

Using it between the Main Spring and the Helper Spring lets you broaden the width of the setting.

### Helper Spring

Even at a high spring rate setting, it ensures the stroke of the re-bounce side and improves the road holding of the tires.

### Dial Attachment

Mounting the dial attachment on the 32-level adjustment dial gives you a smooth and smart feel for the dial clicks. And, it lets you make adjustments easily with your fingertips in vehicle types where the adjustment unit is hard to reach with your hand.

### Control Wire

The Control Wire can be mounted on the Real Sports Damper ZR/TR/GR and Extage series 32-level damper adjustment models. This enables comfortable adjustment in vehicle types where the adjustment unit is hard to reach with your hand and where adjustment can't be done without removing the interior trim.

# ■ KYB COMPETITION SPRING ■

The driving feel of KCS is in a word 'Supple'.

In an actual vehicle test of the springs in the KCS series, the difference between each spring rate was evaluated as easy to understand.

KCS will be your effective tool to get good result in any category of motor sports.

• The linear flow characteristics make it is easy to understand the road conditions

• A precise spring rate that can accurately adjust the car's behavior

(Spring rate tolerance within  $\pm 3\%$ )

• High controllability born from suppleness
